NGCI

CAPABILITY STATEMENT · 2026

Governed AI and technology delivery.

AI-enabled operations for government and enterprise, with human approvals and traceable decisions.

NextGen Consulting Inc. (NGCI) has delivered mission-critical technology for federal, state and commercial clients since 2006: ERP and financials, cloud, cybersecurity, data and system integration. Today NGCI pairs that delivery record with **NGOS**, its own AI operating platform, and **NEMS**, the management system that governs it, so AI drafts and people decide. NGCI runs its own capture, proposal and staffing work on the platform it builds for clients.

Since 2006
Continuous delivery

Federal & State
Plus commercial clients

9
Technology service areas

100%
Human-approved AI decisions

Core competencies

AI PLATFORMS

Governed AI solutions

- **ProposalForge**: compliance matrix, grounded drafting, color-team review
- **TalentFlow AI**: skill matching, résumé tailoring, human dispositions
- **Growth Engine**: targets, campaigns and pipeline
- **SectorAI**: market, agency and funding intelligence
- **NEMS**: policies, controls, approvals and audit evidence

CUSTOM AI

AI built around your workflow

- Workflow and readiness assessments
- Document intelligence and governed retrieval (RAG)
- Assistants and copilots over your systems
- Approval workflows with maker-checker control
- Executive dashboards; prototype to production, you keep the IP

TECHNOLOGY SERVICES

Public-sector IT delivery

- ERP: PeopleSoft FSCM & HCM, upgrades, PUM
- Cloud modernization and infrastructure as code
- Cybersecurity and CMMC readiness support
- Data, reporting and system integration
- ServiceNow, Salesforce, Oracle DBA
- Program management, IV&V and QA

Why NGCI

01
AI inside controls
Every AI output starts as a draft. Authorized people approve what is used or released.

02
Built and run in-house
NGOS and NEMS run NGCI's own operations before they are offered to clients.

03
Separation of duties
No one approves their own work; every decision is recorded with actor and time.

04
Delivery, not demos
Twenty years of public-sector delivery discipline applied to every AI build.

Representative past performance

- **Public-sector ERP & financials:** PeopleSoft FSCM and HCM implementation, upgrades and production support for government agencies.
- **Enterprise modernization:** CRM, ServiceNow and integration programs replacing legacy systems and manual processes.
- **Program management & IV&V:** PMO, quality gates and independent verification on complex technology programs.
- **Governed AI platform:** NGOS and NEMS built and operated for NGCI's own capture, proposal, staffing and finance work.
